Continue Your Education With Restek

Current Course:

GC-MS Fundamentals Seminar

Gain practical knowledge of MS detectors, GC inlets and injection techniques, GC column selection, basic spectral interpretation, maintenance, and troubleshooting.

Presented by Rick Parmely and Neil Mosesman

Sept. 17 Columbus, OH

Sept. 19 Pittsburgh, PA

Sept. 21 Buffalo, NY

Enrollment includes all seminar materials, a continental breakfast, lunch, and afternoon refreshments. See our website for additional registration information.

FREE Live Webinar!

GC-MS Inlet Optimization

A gas chromatograph with mass spectrometer is a very expensive and complex piece of instrumentation, and detecting low-level target analytes with mass spectra confirmation is advantageous in numerous fields of study. Unfortunately, analysts often overlook getting analytes into the gas phase so that they can be properly analyzed. While this oversight is a source of many data problems, it is easily resolved by understanding the mechanisms behind the various injection techniques and knowing how to optimize your GC inlet based on the injection technique used.

Presented by Michelle Misselwitz

Sept. 18 Remote Log In

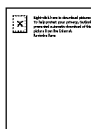

Sept. 20 Remote Log In

See our website for additional registration information.

Can't make the trip? We'll come to you!

Contact RLNSeminars@restek.com for a quote and to arrange for Restek to come to your facility to teach one of our courses!
